

JammeR Loops Trigger Module

Setting up the Novation Launchpad

		Rhodes	Percussions	Sound FXs	Vocals	Harmonies	
1	▶	Loop 3	Stop	Loop 8	Stop	Loop 6	Loop 4
2	▶	Loop 3	Loop 5	Loop 5	No Action	Loop 8	Loop 7
3	▶	No Action	Loop 4	Loop 2	Loop 2	Loop 6	Stop
4	▶	Loop 1	Loop 2	Stop	Loop 6	Loop 8	Loop 5
5	▶	Stop	Loop 5	Loop 7	Loop 8	Loop 5	No Action
6	▶	Loop 1	Stop	Loop 5	Loop 4	Stop	Loop 3
7	▶	Stop	Stop	Stop	Stop	Stop	Stop
8	▶	Stop	Stop	Stop	Stop	Stop	Stop

Step 1: installing the Remote Files

Once you have obtained the Remote Files from www.retouchcontrol.com/jammer-remote, unzip the folder on your computer, navigate to the "Remote Files" folder and double click on the installer script for your OS.

On OSX, the location where the files are installed depends on your Reason version. For those who have upgraded from an older version (Reason 11 or older), the files are installed in the "Application Support/Propellerhead Software/Remote" folder inside the Library directory (case1). Otherwise the files are installed inside the Reason application bundle (case2). In this last case, the installer script will prompt for your password in order to install the files. In both cases, a Terminal window will open once the process is completed.

On Windows, you will see the Console flash quickly and then closing.

You should make sure that the files have been installed correctly by going to the proper directories on your HD. There should be folders named "JammeR" at these two locations:

OSX:

case1: Macintosh HD/Library/Application Support/Propellerhead Software/Remote/Codecs/Lua Codecs

case2: Macintosh HD/Applications/Reason #/Resources/Remote/DefaultCodecs/Lua Codecs

Windows: C:/ProgramData/Propellerhead Software/Remote/Codecs/Lua Codecs

and

OSX:

case1: Macintosh HD/Library/Application Support/Propellerhead Software/Remote/Maps

case2: Macintosh HD/Applications/Reason #/Resources/Remote/DefaultMaps

Windows: C:/ProgramData/Propellerhead Software/Remote/Maps

Please note, on Windows the directory "ProgramData" is hidden by default. You need to enable "Show hidden files". See how to do it here: <https://support.microsoft.com/en-us/help/14201/windows-show-hidden-files>

At this point, you should restart Reason.

If for some reason the files were not properly copied over by the installer script, you can copy and paste those files manually. This is what you do:

- 1) Go to the download, open Remote Files, then "Lua Codecs", copy the entire "JammeR" folder and paste at this location

OSX:

case1: Macintosh HD/Library/Application Support/Propellerhead Software/Remote/Codecs/Lua Codecs

case2: Macintosh HD/Applications/Reason #/Resources/Remote/DefaultCodecs/Lua Codecs

Windows: C:/ProgramData/Propellerhead Software/Remote/Codecs/Lua Codecs

- 2) Then go back to the download, open Remote Files, then "Maps", copy the entire "JammeR" folder and paste at this location

OSX:

case1: Macintosh HD/Library/Application Support/Propellerhead Software/Remote/Maps

case2: Macintosh HD/Applications/Reason #/Resources/Remote/DefaultMaps

Windows: C:/ProgramData/Propellerhead Software/Remote/Maps

- 3) Restart Reason

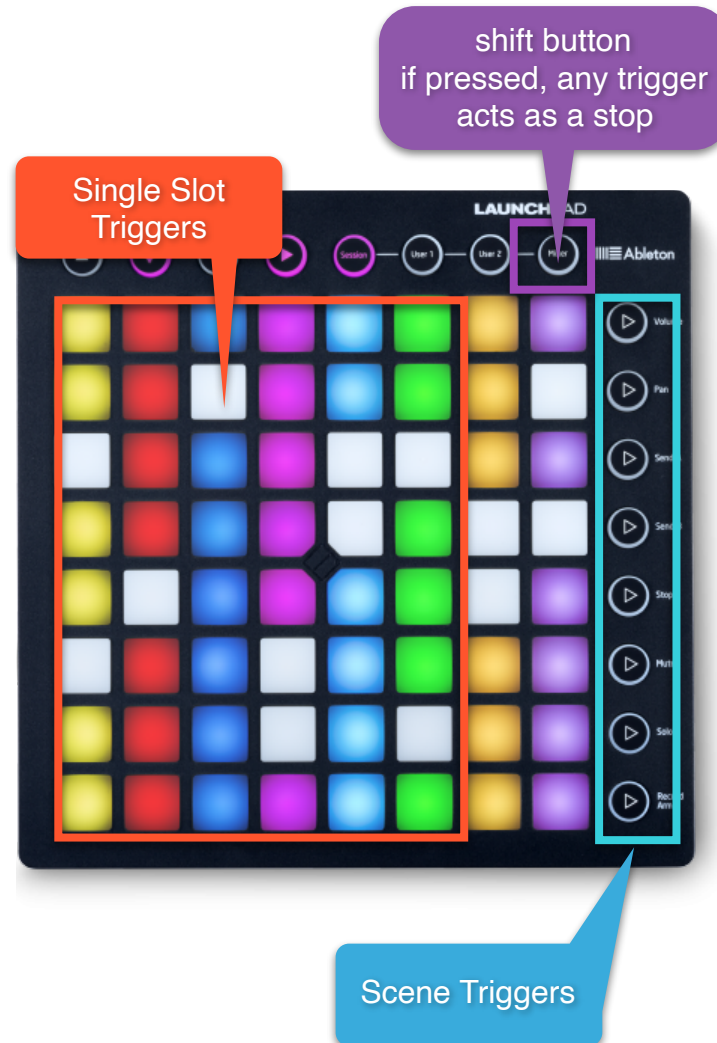

Step 2: create a control surface in Reason

With your MIDI device connected to the computer, launch Reason. Then:

- 1) go to “Preferences” and open the “Control Surfaces” pane
- 2) click on “Add”
- 3) from the “Manufacturer” pull down menu, select “RetouchControl”
- 4) from the “Model” pull down menu, choose the control surface which works with your Launchpad model. Please refer to the chart at the end of the document for details.
- 5) for the “In Port” and “Out Port” choose the midi ports of your device (for some Launchpad Mk1 owners, they are both named “Lauchpad”)

That’s it. Your device is set up to control the JammeR. Next create a JammeR device in the rack, make sure it has track focus in the sequencer and you should be able to control it from your device. The next section shows how the controls are mapped to the device itself.

Control Maps

LaunchPad Models and corresponding control surface in Reason

LaunchPad Models	MK1, S, Mini MK1, Mini MK2	MK2	X*, Mini MK3*, Pro*, Pro MK3*
Control Surface Name	LP_MK1_JammeR	LP_MK2_JammeR	LP_Pro_JammeR

* with the Programmers mode layout selected
